

ArtistScope

Translation for web sites with ASP or FrontPage support

Application

Increase online sales by making your web site readable and easier to navigate for people in other countries. ArtistScope Translate enables web site proprietors to provide language translation into more than 25 different languages for common functions such as navigation menus, contact forms, membership registration, online shopping carts and more.

How it works

Wherever you want words and phrases translated, you simply replace those words/phrases in your html with its calling tag. The calling tag is replaced with the translation on the fly according to the selected/detected language. For example with ASP (or in FrontPage) to display the phrase or sentence for "Please check the details below before submitting" you might simply add a tag similar to `<%= Artis.Tran("slangPleaseCheck") %>`

Requirements

ArtistScope Translate can be used on any web site hosted on a Windows web server with ASP, CFM, CGI or PHP support enabled for the web site. Users with FrontPage web sites will find that ArtistScope Translate is quite simple to install and easy to add to any existing web pages. Supported servers:

- Windows Server 2000
- Windows XP Pro (PWS)
- Windows Server 2003
- Windows Vista with IIS

Installation

ArtistScope Translate is an out of the box installation for web sites hosted on all web sites hosted on Windows servers, such as those using FrontPage extensions with ASP support. The ArtistScope Translate DLL can also be utilised with Cold Fusion, .NET and PHP with very little modification to the web page code calling the words/phrases.

In your download you will find two installers. One is for installing and registering the support DLL on the web server, and the other is the settings file and examples of pages which will illustrate how to convert your existing web pages.

The difference between the demo version and the licensed version is that the demo displays a message at the top of each page reminding you to register.

1. Unpack the install files by running ArtistScopeTranslate.exe
2. Run ArtistScopeLanguagePluginInstaller.exe on the web server to install the DLL
3. Copy the files in the "www" folder to the root of your web site
4. Edit artislang_db.asp to point to your database location (server path).
5. Ensure that ASP is enabled on your web site
6. Visit example.asp online

Registering a web site

If you have a licence key for the site it needs to be added to the settings file. If the site answers to several aliases or domain names, you can list multiple licence codes. ArtistScope Translate can be used in any level within a web site and from any folder providing there is a copy of the settings file in the same folder.

Editing a web site

Converting your web pages to translate on the fly can be done using any html editor including FrontPage. The best explanation of seeing how to do this is by uploading one of the example web pages and looking at the html code. It is quite simple. First start by calling the DLL by adding an ASP statement at the top of the page (as seen in the examples) and then replace your text with the appropriate calling tag.

Languages

Normally when you visit a foreign web site using a computer does not have the appropriate fonts installed, the letters can appear as gobbly gook which is unsightly and impossible to read even if you do speak the language. However with ArtistScope Translate that does not happen. It doesn't matter what languages are installed on the user's computer. The web pages will always appear as a word of art.

Many languages use different words depending on meaning and tense, and machine translations such as those provided by online page translation services can deliver messages that are difficult to understand and misleading. However ArtistScope translations are provided by native speaking persons from the relative countries who are well versed in all things including Internet and computer terminology.

The standard module includes more than 700 words and phrases to cover almost all instances of use, with many phrases up to 100 characters long. If you require different words/phrases to better suit your application you can order a custom module.

Developers wanting different words and phrases to suit individual applications such as corporate web sites, online surveys, content management systems and eCommerce solutions can order a custom solution to include their own list of words and phrases. The maximum length of each phrase is limited to 100 characters. Words and phrases can include html comments such as font boldness, page breaks, returns etc. All contributing translators are well versed in English as a second language. For pricing on custom modules, please see the order page which will price automatically according to the options that you select.

A complete list of the words and phrases included in the standard module can be found in the Appendix of this document. From this list you can replace your words and phrases with the appropriate tag.

Troubleshooting

A copy of the config file needs to be in the same folder as the web page using this module. For example, include a copy of the config file in all folders utilising this module. There can only be one instance of the DLL installed on the server. All web sites can share the same module.

APPENDIX

Words and Phrases:

slangAbout = "About"
slangAboutCardOrders = "About credit card orders"
slangAccessDenied = "Access Denied"
slangAccessories = "Accessories"
slangAccommodation = "Accommodation"
slangAccount = "Account"
slangAccountApproved = "This account has been approved and is active. "
slangAccountExpired = "This account has expired and needs to be renewed. "
slangAccounting = "Accounting"
slangAccountThanks = "Thank you for your application.

When approved by admin you will receive confirmation by email. "
slangAccountWaiting = "This account has not yet been approved by admin."
slangActive = "Active"
slangActivity = "Activity"
slangAdd = "Add"
slangAdditional = "Additional"
slangAddNew = "Add new"
slangAddNewDoc = "Add new document"
slangAddOn = "Add-on"
slangAddress = "Address"
slangAddToCart = "Add to Cart"
slangAdmin = "Admin"
slangAds = "Ads"
slangAdvertising = "Advertising"
slangAffiliates = "Affiliates"
slangAfrikaans = "Afrikaans"
slangAgents = "Agents"
slangAgreement = "Agreement"
slangAgreeRead = "I have read and agree with the "
slangAgreeTerms = " terms of service"
slangAgreeWrong = "You must agree to the terms of service. Please correct and resubmit. "
slangAirmail = "Airmail"
slangAllowUpload = "Allow to upload and send to users"
slangAllPrices = "All prices are in"
slangAllRightsReserved = "All Rights Reserved."
slangAlternatives = "Alternatives"
slangAmusement = "Amusement"
slangAntiLeech = "Anti Leech"
slangApple = "Apple"
slangAppliances = "Appliances"
slangApproved = "Approved"
slangArabic = "Arabic"
slangArt = "Art"
slangArtis = "Artis"
slangArtist = "Artist"
slangAuthenticationFailed = "Authentication failed. "
slangAuthor = "Author"
slangAutomobiles = "Automobiles"
slangAvailable = "Available"
slangBackToList = "Back to list"
slangBankTransfer = "Bank Transfer"
slangBankTransferInfo = "If you choose to pay by bank transfer the instructions and bank details will be sent by email. Please ensure that you print a copy of the order for your records."
slangBankTransferPayment = "Bank transfer payment"
slangBanner = "Banner"
slangBikes = "Bikes"
slangBoats = "Boats"
slangBrand = "Brand"
slangBroadband = "Broadband"
slangBrowse = "Browse"

slangBuddy = "Buddy"
slangBulletins = "Bulletins"
slangBundle = "Bundle"
slangBundleOffer = "Bundling all licences in the one program can save 20% or more"
slangBundleType1 = "Separate programs for each licence"
slangBundleType2 = "One program for all licences"
slangBusiness = "Business"
slangBytes = "Bytes"
slangCables = "Cables"
slangCalculate = "Calculate"
slangCalendar = "Calendar"
slangCameras = "Cameras"
slangCancel = "Cancel"
slangCancelled = "Cancelled"
slangCannotBeFound = " cannot be found"
slangCaptchaWrong = "Captcha security code number is not correct!

Please go back and refresh the page before trying again."
slangCapture = "Capture"
slangCaravans = "Caravans"
slangCardAddress = "Card holder address"
slangCardAmount = "Amount to debit"
slangCardComplete01 = "To complete your online purchase signed authorization by the card owner is required to be sent by either fax or email."
slangCardComplete02 = "Scan the signed document and send by email to "
slangCardComplete03 = "Print this document, sign it and send by fax"
slangCardComplete04 = "From other areas check locally for the prefix to send to 617-3408-0266 in Australia. "
slangCardComplete05 = "ArtistScope is authorized to debit the nominated card for this transaction as itemized below. "
slangCardComplete06 = "I, the undersigned card owner, declare that the item/s have been evaluated from trials "
slangCardComplete07 = "and/or online demonstrations and deemed suitable for our requirements and intended use. "
slangCardComplete08 = "I further acknowledge that the item/s have been specifically ordered for our use and that I fully agree "
slangCardComplete09 = "with the terms of sale and no return policy as defined during the ordering process. "
slangCardExpiry = "Card expiry date"
slangCardItem = "Item purchased"
slangCardName = "Name on card"
slangCards = "Cards"
slangCardsAccepted = "Cards accepted"
slangCardServices = "Card services"
slangCardSignature = "Card holder's signature"
slangCars = "Cars"
slangCases = "Cases"
slangCatalogue = "Catalogue"
slangCategories = "categories"
slangCategory = "Category"
slangCharacters = " characters"
slangCheck = "Check"
slangCheckOut = "Pay Now"
slangChinese = "Chinese"
slangCity = "City"
slangClasses = "Classes"
slangClear = "Clear"
slangClickForLargerView = "Click for larger view"
slangClickHere = "Click here"
slangClickHereIf = " if your download does not start within 3 seconds. "
slangClients = "Clients"
slangCloseWindow = "Close window"
slangClothing = "Clothing"
slangCollapseAll = "Collapse all"
slangColour = "Colour"
slangComment = "Comment"
slangCommerceSolutions = "Commerce Solutions for the Internet"
slangCommission = "Commission"
slangCommunity = "Community"
slangCompany = "Company"
slangCompanyToLicence = "Company to licence"

slangComparison = "Comparison"
